Covered lives	<p>Participants are:</p> <ul style="list-style-type: none"> • Active employees • Retirees (even in retiree-only plans) • COBRA participants <p>Dependents are:</p> <ul style="list-style-type: none"> • Spouse • Children • Domestic partner • Do not count dependents for HRA or any included health FSA 	<p>Participants are:</p> <ul style="list-style-type: none"> • Active employees • Retirees if plan is primary to Medicare • COBRA participants <p>Dependents are (assuming plan is primary):</p> <ul style="list-style-type: none"> • Spouse • Children • Domestic partner
Excludable lives	Residing outside U.S. (based on address on file with employer)	Residing in a U.S. territory
Calculation period	Plan year	First 9 months of calendar year
<p>Calculation method #1</p> <p>May be used by insured and self-funded plans</p>	<p>Actual count:</p> <p>Add the total lives (participants and dependents – see the Covered Lives section) covered for each day of the plan year and divide that total by the number of days in the plan year.</p>	<p>Actual count:</p> <p>Add the total lives (participants and dependents – see the Covered Lives section) covered for each day of the first 9 months of the calendar year and divide that total by the number of days in the first 9 months of the year.</p>
<p>Calculation Method #2</p> <p>May be used by insured and self-funded plans</p>	<p>Snapshot count:</p> <p>Determine the number of covered lives on the same day (plus or minus three days) of each quarter or month of the plan year, and average the result.</p>	<p>Snapshot count:</p> <p>Determine the number of covered lives on the same day (or another day within the same week as used during the first quarter) in the corresponding month of each of the first three quarters of the year (or more dates if the same number of dates are used each quarter) and average the result.</p>
<p>Calculation Method #3</p> <p>May only be used by self-funded plans</p>	<p>Snapshot factor:</p> <p>Determine the number of participants – see the Covered Lives section – on the same day (plus or minus three days) of each quarter or month of the plan year who have self-only coverage. Also determine the number of participants who have other than self-only coverage and multiply that number by 2.35 (to approximate the number of covered dependents). Add the numbers together and average the result.</p>	<p>Snapshot factor:</p> <p>During the first 9 months of the calendar year, on the same day (or another day within the same week as used during the first quarter) in the corresponding month of each quarter (or more dates if the same number of dates are used each quarter) add (1) the number of participants – see the Covered Lives section – who have self-only coverage and (2) the number of participants who do not have self-only coverage times 2.35 (the estimated number of dependents), and average the result.</p>

<p>Calculation Method #4</p> <p>May only be used by self-funded plans</p>	<p>Form 5500: Determine the number of participants at the beginning and end of year as reported on the prior year's Form 5500. If dependents are covered, add the participant count for the start and the end of the plan year. If dependents are not covered, add the participant count for the start and the end of the plan year and average the result. Form 5500 must be filed by July 31 to use this option.</p>	<p>Form 5500: Using the most recent Form 5500, determine the number of participants at the beginning and end of year as reported on the Form 5500. If dependents are covered, add the participant count for the start and the end of the plan year. If dependents are not covered, add the participant count for the start and the end of the plan year and average the result.</p>
<p>Calculation Method #5</p> <p>May only be used by insured plans</p>	<p>Member months/state form: Add the total lives covered on pre-specified days each month in the calendar year as reported on the NAIC Supplemental Health Care Exhibit for that calendar year and divide by 12 (if NAIC annual form is not filed, a similar form filed in the insurer's home state may be used).</p>	<p>Member months/state form: Multiply the average number of policies in effect during the first 9 months of the calendar year by the ratio of covered lives per policy using the prior NAIC Supplemental Health Care Exhibit (if NAIC annual form is not filed, a similar form filed in the insurer's home state may be used).</p>
<p>Aggregating plans/avoiding duplication</p>	<p>Self-funded plans may be aggregated if they collectively provide medical coverage for the same covered lives (e.g., PPO and HDHP; HDHP and HRA) and have the same plan year and plan sponsor. Note: If person is covered under both an insured and self-funded plan, they will be reported twice, once by the insurer and once by the sponsor.</p>	<p>If the same major medical plan options cover the same individuals, the plan that provides primary major medical coverage does the reporting.</p>
<p>Changing the calculation method</p>	<p>May change each reporting year</p>	<p>Not addressed</p>
